

BRAHMA

Easy Installation

The Brahma Wheel Lock's patented fold up design, allows it to be stored flat (2 inches) on a cargo floor, wall, behind or under a seat. To install, simply follow the steps below.

1. Place the components near the wheel as shown in the picture below.

2. Swing and lock the hooks into position

Installation Continued

3. Slide the hooks over the wheel and insert the wheel nut cover.

4. Insert the telescoping hook and snap the lock into the nearest hole.

5. You may now leave your vehicle in the security that only a patented Brahma lock can give you.

Wheel Lock

**The ultimate trailer anti-theft device,
and it also fits many vintage Autos**

Do You Know?

1. Trailer theft has reached “epidemic” proportions in many cities and rural Areas.
2. Approximately 80% of trailers stolen are never recovered.
3. Trailer contents - tools, boats, vehicles, horses, construction materials, are very seldom insured or returned.
4. Hitch style locks are only a token inconvenience for thieves who simply use the trailer’s safety chains to remove the trailer to a more secluded location for lock removal.
5. Most wheel style locks can be removed by giving them a hard pull with a chain and tow vehicle. Tests have proven Brahma wheel locks are the toughest in the business, and the ultimate theft deterrent.

Why Risk Your Investment?

- Your trailer and it’s contents represent a sizeable investment.
- Each time you walk away from your vehicle, it is an easy target for trailer thieves, --whether left attached to your vehicle or not.
- The most effective anti-theft device is the patented Brahma Wheel Lock.

Security

When you invest in a Brahma Wheelock, and use it on your vehicle, you know you have the ultimate anti-theft device working for you.

Patented Design

Each Brahma Wheel Lock is produced and protected by international patents, ensuring that only Brahma can use the many unique features found in the product.

Convenience

Brahma Wheel locks fold down to a convenient height of 2 inches allowing for many convenient storage options.

How it works

A properly installed Brahma Wheel Lock prevents the locked wheel from rotating and also covers the wheel nuts so that the wheel may not be removed and another mounted. Even with a tire deflated, the lock will still be effective. The sheer visible presence of a Brahma Wheel Lock will send a thief looking for an easier target.

Value

You get a lot of protection for your money with a Brahma Wheel Lock. Made of extra strength steel, with thick cross section structural shapes, each lock is a blend of raw strength, cunning design, and ultimate convenience.

Versatility

A Brahma Wheel Lock may be used on the following vehicles and more.

| | |
|-------------------|--------------------|
| Horse trailers | Cargo trailers |
| Utility trailers | Travel trailers |
| Boat trailers | Office trailers |
| Car Trailers | Road sign trailers |
| Flat bed trailers | Vintage cars |

Two Models Available

Brahma Wheel Lock Model WL001 fits most 15” and 16” wheel-tire combinations.
Brahma Wheel Lock Model WL002 fits most 13” and 14” wheel-tire combinations and the front wheel of most single position ATVs.
Flat Lug Nut Cover Model WL001A allows installation of both models on alloy wheels.
